- . **Hacemos la correlación***
- . predict residuo1, resid
 (325 missing values generated)
- . cor educ fatheduc
 (obs=753)

	•	fatheduc
educ	1.0000	
fatheduc	0.4425	1.0000

. cor fatheduc residuo1
(obs=428)

. ***la variable fatheduc no es buen indicador del salario porque se observa qu > e no hay correlación

PREGUNTA 1.B

- . ****CONDICION DE ORDEN****
- . ***Ahora evaluamos las condiciones de orden
- . **primero identificamos las variabñes endogenas y exogenas del modelo
- . **VARIABLES ENDOGENAS: W LOG(SAL)
- . **VARIABLES EXÓGENAS: EDUC EDAD NIÑOST INNO EXPE EXP2
- . **Hacemos la condicion de orden de la primera ecuación
- . **hacemos la condicion de orden para la primera la ecuación

- . **Identificamos el níumero de variables excluidas en la primera ecuación: 2(e
 > xpe exp2)
- . **Número de variables endógenas incluidas al lado derecho de la 1ra ECUA : 1(
 > logsal)
- . ****Como el número de variables exógenas escritas en la primera ecuación es mayor el número de variables endógenas. Incluidas uno al lado derecho de la primera ecuación.
- . *****Se concluye que la ecuación de las horas de trabajo está Sobreidentifica > da.
- . **Hacemos la CONDICIÓN DE ORDEN de Orden de la Segunda Ecuación
- . **VARIABLES ENDOGENAS: W
- . **VARIABLES EXOGENAS: EDAD NIÑOS UNO

Numero de variables exogenas excluidas en la segunda ecuación: SON 3 (EDAD NIÑOST INNO)

Número de variables endógenas incluidas al lado derecho de la segunda ecuación : ES ${\sf SOLO~1}$ (W)

Como el número de variables exógenas exluidas en la primera ecuación es mayor al numero de variables endogenas incluidad (1) lado derecho de la primera ecuación
